EDUCATION

CRAWFORD UNIVERSITY

November 2024

Bachelor of science in computer science.

Second Class upper [3.85]

Relevant Coursework: Operating Systems, Introduction to Web Development, Model Based Software Engineering, Programming with C#, Programming in Java, Embedded Systems, Object Oriented Software Development, Artificial Intelligence and Applications.

SKILLS

Html, Css, Javascript, React Js, React Native, Figma (Ui/Ux), Git, Github, Jquery, Tailwind, Typescript, Next.js, Java, Excel, Powerbi.

WORKING EXPERIENCE

Deo potential schools

January 2025 - March 2025

Lagos, Nigeria

Web developer

- Led and built the school's website, boosting online presence and resource access

GDSC Crawford

November 2023 - June 2024

Member (Web development)

Lagos, Nigeria

- Participated in web development study jams and workshops focused on front-end frameworks like React and version control with Git.

Sanlam Allianz Insurance

July 2023 - October 2023

Software Engineer / Data Analyst intern

Lagos, Nigeria

- Tested debugged and optimized lines of code of the company's website
- Utilized React.js to create reusable code allowing easy re-rendering of recurring user interface elements
- Managed and organized large datasets to uncover actionable insights, ensuring data accuracy through rigorous cleaning and validation processes that improved reporting reliability.
- Designed and deployed interactive dashboards in Power BI, enhancing real-time visibility of key metrics and enabling faster, data-driven decisions across departments.
- Conducted quarterly performance reviews and competitive research, producing detailed reports that guided leadership in evaluating market position and business growth.
- Evaluated policy documents across organizations, informing internal updates and aligning practices with industry standards.

Fliptotech

June 2023 - July 2023

Web developer instructor

Lagos, Nigeria

- Taught HTML, CSS, JavaScript, and UI/UX design with Figma at FLIPTOTECH, equipping students with industry-relevant web development and design skills through hands-on instruction.
- Designed and implemented a practical, project-based curriculum that bridged technical concepts with real-world applications, enhancing student readiness for tech career

PROJECTS

- Developed a heart monitoring mobile application with a team using React Native and EAS Build, integrating Bluetooth Low Energy (BLE) for real-time data synchronization from a smartwatch and Firebase for secure user authentication.
- Designed and developed a responsive React-based platform where users can browse products, view details, manage a shopping cart (add/remove items), integrated external product data using a RESTful API with Axios, managed global state with React Context API, implemented local Storage for cart persistence, and used React Router for navigation.
- Created a responsive React application that allows users to search and browse popular movies, save favorites with React Context API and local Storage for persistence, and delivers a seamless user experience across devices through responsive design and API integration.
